Professional Summary

UI/UX Designer with 5+ years of experience leading end-to-end design across enterprise SaaS, B2B, and consumer-facing products. Skilled at the full design lifecycle — from user research, journey mapping, and interaction modelling through to high-fidelity prototyping, usability testing, and design handoff. Brings additional front-end knowledge in React, HTML, CSS and JS, enabling closer collaboration with developers and faster design validation in live environments. Experienced facilitating cross-functional workshops, building scalable design systems, and integrating AI-assisted workflows to accelerate design delivery without sacrificing craft.

Core Competencies

UX Research & Strategy: User Research, Usability Testing, Persona Development, User Journey Mapping, Information Architecture, Jobs-to-be-Done, Heuristic Evaluation, Accessibility (WCAG 2.1).

Interaction & Visual Design: Wireframing, High-Fidelity Prototyping, Interaction Design, Micro-animations, Responsive Design, Design Systems, Component Libraries, Figma, Adobe XD, Sketch, Notion, Procreate.

Front-End Fluency (Design Support): React, MUI (Material UI), HTML5, CSS3, Google Stitch, JavaScript, Responsive UI Implementation, Design-to-Code Handoff, GitHub.

Enterprise & Collaboration: Cross-functional Facilitation, Workshop Design, Agile/Scrum, JIRA, Confluence, Executive Communication, Roadmap Influence.

AI-Assisted Design: Claude, ChatGPT, Figma Make, Notion AI, Miro AI, Google Stitch, Structured Prompt Design, AI Workflow Integration.

Professional Experience

UI/UX Designer & Front-End Developer (Volunteer) | Turmitech, Ottawa, ON, Remote

Mar 2026 – Present

Contributing across the full design-to-development lifecycle for a live product team — leading UX design in Figma and implementing interfaces using React, Javascript, MUI, and Google Stitch.

- Own the full UX design process for new product features — from defining user flows and wireframes through to high-fidelity Figma prototypes ready for development. Conduct usability testing on prototypes and iterate based on findings before development begins.
- Built and maintained a scalable Figma component library aligned with the React/MUI component structure — covering all UI states, variants, and interaction patterns to create a single source of truth across design and front-end.
- Built interactive Figma prototypes for key user journeys and facilitated usability testing sessions — synthesizing findings into prioritized design improvements and communicating outcomes to the product team.
- Leveraged Google Stitch to support data connectivity and workflow automation within the product, collaborating with the team to ensure seamless design and functional alignment across connected services.

UI/UX & Web Designer | Fellows Towing, Mississauga, ON, Hybrid

Dec 2024 – Jan 2026

Owned the end-to-end UX function for a growing service business, designing customer-facing and internal experiences while building AI-assisted workflows to scale the team's capacity.

- Designed and maintained scalable Figma component libraries and responsive layouts to streamline design consistency across marketing and operational platforms.
- Redesigned core conversion-critical UX flows and optimized AI-assisted content strategies, contributing to a 65% increase in call conversion rates.
- Developed and managed design system, boosting efficiency and improving consistency across the websites.
- Led UX discovery workshops and prioritization sessions with cross-functional stakeholders to surface systemic pain points and translate them into actionable design and workflow improvements.
- Established documentation frameworks in JIRA Product Discovery and Confluence to govern design decisions, interaction standards, and sprint deliverables — enabling scalable team onboarding and pattern reuse.

IT Analyst (UX & Systems Support) | Fullsteam, Markham, ON, Hybrid

Apr 2023 – Dec 2024

Embedded within enterprise product and engineering teams to design, document, and improve cross-system UX workflows across POS and PMS platforms.

- Partnered with product, engineering, and operations teams to map and redesign complex end-to-end user workflows spanning multiple platforms — identifying systemic friction and defining scalable, enterprise-grade solutions.
- Established interaction guidelines and UX documentation standards in Confluence, creating reusable reference frameworks adopted by multiple product and development teams.
- Led cross-functional working sessions with IT, product, and business stakeholders to drive consensus on workflow priorities, interaction direction, and implementation sequencing.
- Operated independently in ambiguous, multi-stakeholder environments — managing competing priorities, surfacing systemic patterns, and driving clarity across complex initiatives.

UI/UX Designer | Buyerfolio, Toronto, ON, Remote

Mar 2022 – Mar 2023

Led UX design across a consumer-facing real estate web platform, shaping both the product direction and the design process from scratch.

- Led experience design from discovery through delivery for customer-facing web products, defining interaction models, user flows, and experience guardrails before development began.
- Facilitated cross-functional design workshops and Agile ceremonies with developers, product, and SEO teams — enabling early-stage alignment on interaction direction and architectural decisions.
- Designed scalable, reusable UX artifacts and component systems that informed development standards across the product, reducing inconsistency and rework during delivery.
- Presented experience rationale and workflow models to internal stakeholders, influencing product direction and roadmap priorities based on user research and systems analysis.

UI/UX Designer | Xplore Bhilai, Bhilai, India, On Site

Jun 2016 – Oct 2019

- Designed and delivered public-facing websites and digital products with a focus on usability and conversion optimization.
- Conducted client discovery sessions, usability testing, and information architecture exercises.
- Produced wireframes, mockups, and interactive prototypes using Figma and Adobe XD.
- Supported multiple client projects simultaneously while maintaining quality and consistency.

Education

Postgraduate Diploma – Software Engineering & Technology- *Centennial College, Scarborough, ON* | 2021

Bachelor of Engineering – Information Technology- *SSEC, Bhilai, India* | 2016

Certifications

Google UX Design Professional Certificate (2022) • UX Digital Skills (2024) • Responsive Web Design (2025)
• React Full Course(2026)
